DTF STATION

Prisma Auto

Heat Press

Automatic press designed for **high-volume, low-effort transfers**.

Press and Go

41x51 cm
Platen size

220 °C
Max temperature

Patented RAMSPIN quick-change.

Switch between auto-open and manual operation without tools, so one press covers both ways of working.

Patented RAMLOCK platen system.

Fast changes between lower platens, which is what makes short specialty runs viable.

Slide-out lower platen.

Load garments away from the heat rather than reaching over it.

On-screen pressure sensor.

Shows actual pressure, so presses are consistent and reliable instead of judged by feel.

Interchangeable control box.

Removes easily for quick service, so a fault is a swap rather than downtime.

Support and warranty

- **Lifetime** DTF Station tech support
- **1-year limited warranty** on non-consumable parts
- **Patented RAMSPIN and RAMLOCK** systems
- Interchangeable control box for quick service

DTF STATION

Automatic Open, Manual When You Want It.

Automatic when you want it.

The patented RAMSPIN system switches the Prisma Auto between auto-open and manual operation quickly. For a shop whose work is mostly volume but sometimes fiddly, that flexibility is worth more than pure automation.

Load without burns.

A slide-out lower platen brings the garment to the operator instead of the operator to the heat, and a laser-cut base lets garments load flat without stretching.

Consistent pressure, easy service.

An on-screen pressure sensor makes every press repeatable rather than a matter of feel, and the interchangeable control box removes for quick service.

Install & Facility

Dimensions (W x D x H)	43 x 76 x 102 cm (17" x 30" x 40")
Machine Weight	45 kg (100 lb)
Power Supply	110 V
Rated Current	16.4 A
Power Consumption	1,800 W

Specifications

Platen Size	41 x 51 cm (16" x 20")	**Pressure Sensor**	On screen
Operation	Auto-open and manual	**Control Box**	Interchangeable, removable
Quick-Change	Patented RAMSPIN	**Power Supply**	110 V
Platen System	Patented RAMLOCK	**Rated Current**	16.4 A
Max Temperature	220°C (430°F)	**Power Consumption**	1,800 W
Lower Platen	Slide out	**Machine Weight**	45 kg (100 lb)
