DTF STATION

Seismo S20

Powder Station

Compact, single-sheet shaker that delivers **consistent powder application** with beginner-friendly operation.

Simple Manual Powdering

41x51cm
Media size

15W
Power

Single-sheet powder station.

Manually operated, sized for 16" x 20" media, and built for one sheet at a time rather than a roll.

Simple, intuitive operation.

Minimal setup and a workflow a first-time DTF user can run on day one.

Efficient powder coverage.

Even application without the waste that comes from powdering by hand over a tray.

Easy-access design.

Opens up for quick cleaning and maintenance, which matters more on a manual station than an automatic one.

15W on a standard outlet.

Effectively no power draw and no install. It plugs in anywhere.

Works with

- Prestige R1
- Prestige R2 Pro
- Prestige A3 and A4
- Phoenix Air 16x20 for curing

See it run. Contact your DTF Station dealer or visit **dtfstationglobal.com**.

DTF STATION

One Sheet at a Time, Done Right.

Powdering, without the roll.

The Seismo S20 is a manual, single-sheet powder station for shops running desktop DTF printers. It handles media up to 16" x 20", one sheet at a time, and it is the cheapest honest way to get consistent powder coverage before a curing step.

Built for a first DTF setup.

Setup is minimal and operation is intuitive, which makes it the right starting point for someone who has never powdered a transfer. Pair it with a Phoenix Air 16x20 for the curing side.

Cleans up quickly.

An easy-access design means clearing residual powder is a short job rather than a disassembly.

Install & Facility
